

MASYN ROTH

EDUCATION

FUNDAMENTAL COURSES, COMPUTER SCIENCE
Community College of Beaver County

Sep 2023 - Jun 2025

BACHELOR OF SCIENCE, COMPUTER SCIENCE
Franklin University
Pursuing Bachelor's Degree

Sep 2025 - Jun 2027

PROJECT EXPERIENCE

LUA APPLICATION DEVELOPER
Cressida Studios

Mar 2024 - Present

- Developed and maintained an application that reached over 1 million users and generated over thirty thousand dollars in revenue.
- Implement new features based on user feedback, driving continuous improvement and user satisfaction.
- Optimize Lua codebase for performance, resulting in faster load times and improved user experience across multiple platforms.
- Collaborate with teams to design and implement robust Lua solutions, ensuring seamless integration with existing systems.
- Conduct thorough code reviews and implement best practices, significantly reducing bugs and enhancing overall application stability.

DATA ANALYTICS BOT
Personal Project

- Developed a Discord bot using Python to collect data analytics on user activities within a server.
- Automated the process of capturing user interactions, messages, and other relevant data.
- Designed and implemented scripts to process and insert the gathered data into an SQL database in real-time.
- Ensured data accuracy and integrity by handling exceptions and validating inputs.
- Leveraged SQL queries to generate insights and reports based on the stored data, facilitating better server management and decision-making.

TECHNICAL SKILLS

- SQL: Proficient in writing complex queries, stored procedures, and optimizing database performance. Experienced with relational database management systems such as MySQL and PostgreSQL.
- MongoDB: Skilled in using MongoDB for managing NoSQL databases, including schema design, indexing, and aggregation frameworks.
- AI & Machine Learning: Proficient in modern AI tools and frameworks including PyTorch, TensorFlow, and OpenAI APIs. Experienced in developing AI-driven applications.
- Python: Proficient in Python for data analysis, automation, and scripting. Familiar with libraries like Pandas, NumPy, and Flask for web applications.
- Java: Strong background in Java for building cross-platform applications. Experience with Java frameworks such as Spring and Hibernate for enterprise-level development.
- Lua: Experienced in Lua scripting for game development, particularly in environments like Roblox and game engines like Corona SDK.
- JavaScript: Skilled in using JavaScript for both front-end and back-end development, including frameworks like React, Node.js, and Express.

PROFESSIONAL SUMMARY

Technically proficient and driven software developer with practical knowledge of several programming languages, such as C#, Python, Java, JavaScript, C++, and Lua. adept at managing databases with SQL and MongoDB and has a strong background in web development with HTML and CSS. Renowned for their ability to promptly adjust to novel technologies and continuously produce superior code. intends to continue studying in order to earn a bachelor's degree. Currently pursuing an associate's degree in computer science. skilled at solving problems, collaborating with others in a team setting, and dedicated to lifelong learning and career development.
